OUR SUPPLY STRENGTHS

BASED **UK** IN THE

Stock holding & Super-fast Delivery

Abracs are a UK based company delivering expert manufacture and service of abrasive products to the UK market. Our York based HQ maintains a consistent 99% stock availability on our entire product range so you can rely on any product being shipped directly, on time and in full when you order before 4pm.

SERIOUS PRODUCT QUALITY

Manufacturing Expertise & Accreditation

At Abracs, we only produce professional products for the professional user. Every single Abracs product is manufactured with absolute quality to European safety standards. Each product must undergo our rigorous testing and quality control procedures which have earned us the recognised RISQS, ISO 9001 and O.S.A accreditation for our European manufactured products. The Abracs quality assurance stamp is our seal of approval to our customers.

FOCUSED CUSTOMER SUPPORT

Our Dedication to Customer Support

In addition to being visited in person regularly, every enquiry, request or order you place with Abracs is managed by your own dedicated internal account manager based at York HQ. Our customer focussed marketing department is dedicated to your support. If there is anything you need, contact us and we will make sure you are absolutely satisfied, supported and happy with our service.

DEPTH OF PRODUCT RANGE

Extensive Range of Abrasives

Our range variation, depth and quality provides you with everything your market requires, there is no need to deal with the issues associated with multiple supply sources. We are recognised as the one stop solution for abrasives, consumables and allied products and are committed to consistent and comprehensive supply.

ESTABLISHED **1989**

Nearly 3 Decades of Experience

We have a wealth of industry experience that you can benefit from as an Abracs customer, our team have over 150 years shared experience with abrasive markets & products and our company has been producing professional quality abrasive products for the best part of 3 decades.

DISTRIBUTOR SUPPORT ✓

**Quality assured products, comprehensive support & unrivalled choice.
All you need to grow your business.**

ACCOUNT MANAGEMENT

Your dedicated account management team will work closely with you at stock, delivery and sales support level to ensure that you are receiving an excellent level of service at all times.

PERSONAL SERVICE

We believe our customers deserve to be dealt with on a personal level. Should you need the any face to face advice or technical support we can have an expert advisor at your premises or on site within 24 hours.

ORDERING MADE EASY

We understand that ordering should be as quick and easy as possible for our customers. Call, e-mail or fax your order and your personal account manager will take care of it for you.

NEXT DAY DELIVERY

All of our stock is held in the UK so next day delivery comes as standard when you order before 4pm. We have pre 10 and pre 12 delivery options available for our customers as well as interactive order tracking so you know exactly when to expect your order.

SALES TRAINING

We can provide comprehensive sales support for any of our products, from sales aids and application charts to features and USP information. We offer advice on your market requirements and can even present to your sales team at your own premises.

MONTHLY PROMOTIONS

Our Super 6 product offers allow you to purchase a wide range of products at an unbeatable price, every month. We deliver these to your door and can provide an accompanying end user version to help you to boost sales. If you have any suggestions for offers you would like to run please contact us.

ONLINE SERVICES

Our website and social media services are designed to aid customers with resources and information and keep you up to date with new services, features and offers. We don't sell to end users so we direct our website traffic directly to our customers by using search engine analytics to forward product page enquiries to your website.

Please visit us online at our website page, Facebook page and Twitter page. Full details of our product range, new products, special offers plus much more information is available to you. Get instantly up to date with all our news and information.

Please visit, follow and like us! If you have a new feature or service to your business, let us know as we can feature you on our news hub.

Visit www.abracs.com for product information, new products and special offers & contact the team today to find out how our online services can help generate business for you.

MERCHANDISING OPTIONS

We offer a wide range of branded display stands to showcase our premium quality products.

DISPLAY STANDS

Exclusive merchandising solutions enable professional presentation of our premium quality abrasive products across small and large sales spaces. Informative and sales focussed packaging makes the journey to purchase much clearer and easier for customers to find the product they require.

Our stands are available to all of our distributors and we can provide them for free when you place an order for stock.

BIG ON INNOVATION

Abracs are continually developing new & innovative abrasive product solutions to effectively service our industrial markets.

PRODUCT DEVELOPMENT

At Abracs we are continually working to improve, re-develop and innovate to provide abrasive solutions for our industrial markets. Without the help of our loyal and long-standing customer base we would not be able to achieve the exceptional results in product development and innovation that we are recognised for in the industry today.

OUR DEVELOPMENT PROCESS

Every innovative product starts with a good idea.

We first need to determine what the exact industry requirement is in order to most effectively solve a problem with a product solution, after all, every Abracs product is designed to help our industries to run more effectively, efficiently and safely, helping people to save time and money. We ask to what degree the new product idea will enable this.

Once we are satisfied with the feedback and have analysed all of the associated aspects of the new product idea in detail with our customers and industry experts, our product management team develops the concept and starts the product development process which, after extensive research and development results in our first test samples.

Not only do we put the new product through our rigorous quality management procedures to ensure safety and quality but we also ensure that we are able to produce our new innovation to a consistently high standard for mass markets. Only when all of these elements have been fully satisfied do we start production.

We believe that it is not good enough to stop here, we batch test every production so we can guarantee the consistently high level of quality expected by customers when they purchase an Abracs product.

We have an expectation from our customer base to offer new, exciting and innovative products at the highest quality level, this is what we have built our reputation on and is what the Abracs name is recognised for.

EXPERTS AT EXPORT

We pride ourselves on offering our export customers an extensive range of quality assured products and a reliable personal service.

JOIN OUR GLOBAL NETWORK

Abracs has a wide-reaching global distribution network covering many different industrial markets and we supply products into some of the biggest names in the industry. We have invested heavily in our export support services and we are looking for the right export partners to distribute the UK's number one abrasive consumables brand. With Abracs you can stand out from your market by stocking a unique and extensive range of professional products.

DEDICATED ACCOUNT MANAGEMENT

As an export customer your account will be personally managed by our Export Manager Paul Cockerill, he will ensure that you are completely satisfied with your service at Abracs and work together with you to build up a loyal customer base by providing you with all the tools necessary to target to your local market effectively. We understand that every global market has different requirements so we tailor our package to suit you.

FULLY ACCREDITED

We have worked extremely hard over the years to attain accreditation for safety, quality control, design and manufacture and we are pleased to have the recognition and approval of renowned governing bodies including O.S.A. (Organisation for Safety of Abrasives) on all of our European manufactured products. The quality management system BS EN ISO 9001 and RISQS (Railway Industry Supplier Qualification Scheme). The Abracs quality assurance stamp is our own quality seal of approval to all of our UK and Export customers.

EXCEPTIONAL SUPPORT

We pride ourselves on offering a flexible and approachable service to global customers. We offer exceptional customer support including marketing packages, merchandising suites, frequent in-country visits, product training, brand support, product samples, tailored freight solutions and flexible terms options.

BECOME AN INTERNATIONAL PARTNER

If you are interested in introducing the Abracs brand into your local market, our knowledge and experience gathered over the last 26 years ensures that the level of service, quality and support our export customers expect are exceeded. If you are interested in the opportunity to work with a unique and exciting UK brand, contact Paul Cockerill and he will personally guide you through the process of becoming one of our valued export partners.

"Introducing Abracs was one of the best purchasing decisions that we have made as a company, Abracs is now one of our best-selling brands. The branding is excellent, the range is always growing and the overall support we receive cannot be surpassed"

DISC TYPES & APPLICATIONS

We stock a comprehensive range of premium quality Cutting, Grinding and Extra Thin Discs available for every application.

RANGE INFO

Abracs' signature product range, we offer one of the most comprehensive and highest quality abrasive disc ranges available on the UK market. We have an extensive range of Cutting, Grinding, Extra Thin and Specialist discs available for use on a wide range of applications. All Abracs discs are subject to our rigorous quality control procedures and are manufactured to European safety standards. We have classified the range into 3 star and 5 star quality levels & application types to make selecting the right product as easy as possible.

ABRASIVE CUTTING DISCS

Our Cutting Discs offer consistent and smooth cutting, maximum product lifespan, performance and quality. Available in a comprehensive range of sizes for a wealth of applications including metal, stone, stainless steel and aluminium cutting supplied in both Proflex 3 star and Phoenix 5 star quality levels.

ABRASIVE GRINDING DISCS

Our Grinding Discs offer heavy duty abrasive grinding, excellent performance and incredible product life. Available in a comprehensive range of sizes for a wealth of applications including metal, stone, stainless steel and aluminium grinding supplied in both Proflex 3 star and Phoenix 5 star quality levels.

EXTRA THIN CUTTING DISCS

Our Extra Thin Cutting Discs are INOX discs designed for fast and precise low vibration cutting and are both high performance and long lasting. Suitable for a wealth of metal applications including stainless steel. Available in both Proflex 3 star and Phoenix 5 star quality levels.

QUALITY LEVELS

Our abrasive discs range is split into 2 professional quality levels to make blade selection simple.

PROFLEX ★★★★★

PROFLEX 3 STAR Cutting, Grinding and Extra Thin Discs are extended performance, professional quality products manufactured using high quality materials with an attractive price-performance ratio for the price conscious consumer.

PHOENIX ★★★★★

PHOENIX 5 STAR Cutting, Grinding and Extra Thin Discs are ultimate performance, produced to O.S.A. Safety standards & manufactured using premium quality materials, giving long life and excellent value, offering one of the best cost per cut ratios in the market.

APPLICATION GUIDE

Our range is separated into discs for Metal, Stone, Inox and Aluminium. Applications are highlighted with a category colour.

METAL

Metal cutting discs are suitable for a wide range of metal applications including mild steel, iron, sheet steel & construction steel.

STONE

Stone cutting discs are suitable for a wide range of stone applications including natural stone, concrete, bricks & tiles.

INOX

INOX cutting discs are specially designed for use on stainless steel as well as a wide range of non-ferrous metals.

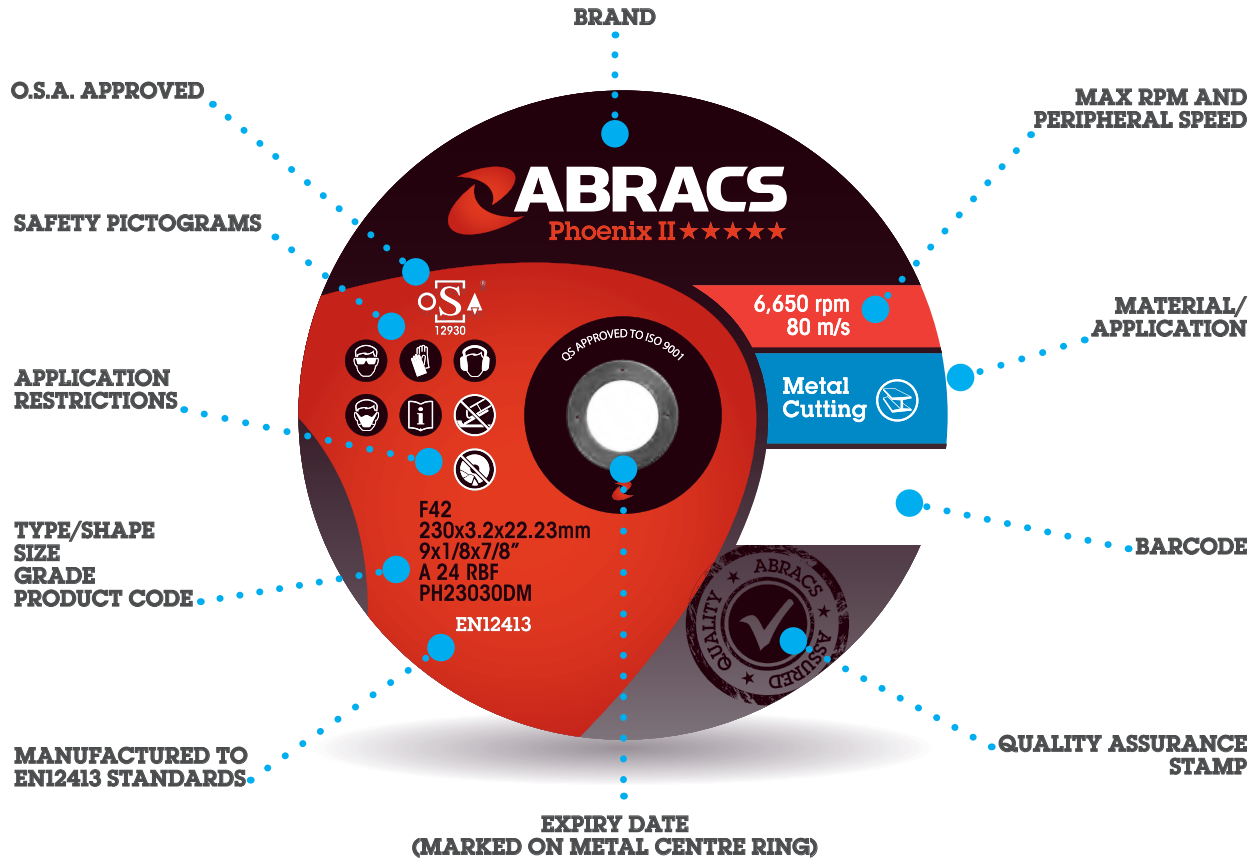

ALUMINIUM

Aluminium cutting discs are specially designed for use on Aluminium as well as a wide range of non-ferrous metals.

ABRASIVE DISCS MARKING SYSTEM

Training and additional information on the safe use and fitting of abrasive wheels is available from Abracs.

GRADE EXPLANATION

INDICATES THE ABRASIVE GRAIN
A = Aluminium Oxide for metal
C = Silicon Carbide for stone

INDICATES THE
HARDNESS OF THE DISC

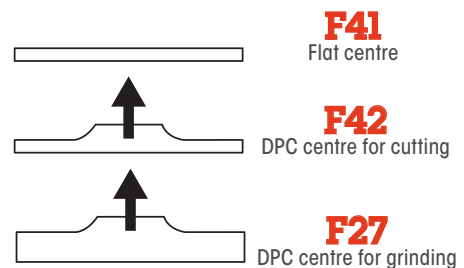

A 30 S BF

INDICATES THE GRIT SIZE
The higher the number,
the finer the grade

INDICATES THE NATURE
OF THE BOND
'BF' stands for
reinforced bond

SHAPE EXPLANATION

Abrasive discs are available in several different types, the most commonly used are shown below.

THE SAFE USE OF ABRASIVE CUTTING & GRINDING DISCS

It is very important to always comply with all safety and accident prevention regulations when using abrasive cutting and grinding discs.

All Abracs blades are marked with the appropriate safety information pictograms.

Always observe
ALL safety
instructions

Always wear
ear protection

Always wear
a dust mask

Always wear
safety goggles
or glasses

Always wear
safety gloves

MAXIMUM OPERATING SPEEDS ARE MARKED CLEARLY ON ALL ABRACS DISCS AND SHOULD NEVER BE EXCEEDED.

CUTTING DISCS PROFLEX & PHOENIX II

Abracs Cutting Discs are available in both Proflex 3 star & Phoenix 5 Star quality levels for metal & stone applications in an extensive range of sizes. Our experience in manufacturing processes developed over nearly 3 decades, combined with the use of premium quality raw materials enables us to produce cutting discs with significant increases in product lifespan, performance and quality. All Abracs cutting discs are manufactured to European safety standards and marked with EN12413.

PROFLEX ★★☆☆☆

Proflex discs offer professional quality performance and are a great value cutting disc, priced competitively with an exceptional cost per-cut ratio.

PHOENIX ★★★★★

Phoenix discs are produced to O.S.A. Safety standards. Manufactured using premium quality materials, Phoenix 5 star discs offer ultimate performance, long life, outstanding value and one of the best cost per-cut ratio's in the market.

If you need any help selecting a disc for a specific machine or application the Abracs team can help.

Bulk rates are available for outer quantities and volume orders. Ask the team for details.

Use PF in the highlighted area of the product code for Proflex discs or PH for Phoenix discs e.g. PH11530FM

GRINDING DISCS PROFLEX ★★★★★

Abracs Proflex Grinding Discs offer heavy duty abrasive grinding, professional performance and outstanding product life. Available for both metal & stone applications in a comprehensive range of sizes to suit a wide variety of working machines. All Abracs Grinding Discs are manufactured to European safety standards and marked with EN12413. Proflex Grinding Discs are an incredibly good value product with an exceptional cost per cut ratio.

If you need any help selecting a disc for a specific machine or application the Abracs team can help with selection

Bulk rates are available for outer quantities and volume orders. Ask the team for details.

EXTRA THIN CUTTING PHOENIX II ★★★★★

Our Phoenix discs are one of our signature products. A superior quality European manufactured range of extra thin cutting discs produced to O.S.A. Safety standards. Extremely fast and precise cutting with minimal effort required. Phoenix discs have been developed for precision cutting sheet metal and with strengthened core stability for reduced vibration. Our Phoenix Extra Thin Discs do not contain iron, sulphur or chlorine so are suitable for stainless steel cutting applications.

Brand new Phoenix 230mm x 2.0mm DPC now available for increased stability Extra Thin Cutting.

Bulk rates are available for volume orders. Ask the team for details.

CUTTING DISCS PHOENIX SILVER★★★★★

Phoenix Silver is a European manufactured disc range free from Iron, Sulphur and Chlorine. Similar to our Extra Thin Cutting Discs range the Phoenix Silver range of cutting and grinding discs is designed specifically for use on stainless steel as these specialist discs do not leave residue or contamination. Produced to O.S.A. Safety standards and marked with EN12413.

These specialist discs are popular for use within the food, nuclear and petrochemical industries.

Call the Abras team for information on how you can target new customers and industries with our specialist disc range.

CUTTING DISCS PHOENIX ALI★★★★★

Phoenix Ali are expert quality, heavy duty specialist Cutting and Grinding Discs designed specifically for use on aluminium and other non-ferrous materials. The composition of this specialist disc is designed so it is highly resistant to clogging and will protect against overheating the material. Made to O.S.A. Safety standards and marked with EN12413.

Cutting aluminium with abrasive discs that are not specifically designed for aluminium can be dangerous. Make sure you are always using the right disc for the cutting application.

SEMI-FLEXIBLE GRINDING DISCS

Semi-flexible grinding discs are designed for aggressive stock removal on stone applications & cast iron. These extremely durable and heavy duty silicon carbide grinding products are premium quality and have an exceptionally long service life. The contoured surface is designed to consistently remove high levels of stock over a wide range of applications.

Semi-flexible discs should always be used with a backing pad.

Turn to page 31 for full Abracs Backing Pad Range.

RAIL PRODUCT DEVELOPMENT

We have been working on the development of our Rail Abrasives Range alongside the top names in the rail industry for over 25 years. Our close collaboration has resulted in Abracs being able to produce some of the most effective and high spec abrasive rail products available on the market. Every product we supply into the rail sector through our distribution network is manufactured from premium quality materials subject to our rigorous quality control procedures and product testing. We have O.S.A. Accreditation on every product in our rail range.

*"We supply into some of
the biggest names
in the industry"*

Call our dedicated rail products

FLAP DISC

20% Longer Life and Stock Removal

HYBRID DISPLAY PACK

The new Abracs "Hybrid" products consist of the "5in1 MAXI" disc for cutting virtually all materials; the "3in1 MULTI" disc for cutting, grinding and finishing applications; and the "20%+ FLAP" disc, manufactured using different grains of material to achieve increased lifetime and stock removal.

Specification	BOX QTY	Product Code	List Price
115mm Display Pack - Contents: 75 x "3in1" Multi Disc, 20 x "Plus 20%" Flap Disc, 100 x "5in1" Maxi Disc	1	HYDISP115	£332.85
125mm Display Pack - Contents: 75 x "3in1" Multi Disc, 20 x "Plus 20%" Flap Disc, 100 x "5in1" Maxi Disc	1	HYDISP125	£399.00

HYBRIDS 5 IN 1

The "5 in 1" Maxi disc has been designed for cutting applications on virtually all materials including metal, stone, stainless steel, aluminium and plastic/PVC. The 1.6mm thickness ensures a fast and clean cut. Professionals using this disc will no longer need to change discs for different materials leading to higher productivity, reduced product issues and increased operator safety.

Hybrid 5 in 1 discs can greatly improve efficiency on site

HYBRIDS 3 IN 1

The "3-in-1" Multi disc can be used for cutting, grinding and finishing applications simply by altering the angle at which the disc is used. 90 degrees for cutting, 30 degrees for grinding and 15 degrees for finishing. An extra layer of reinforcing has been added to the disc to ensure that it can cope with additional side pressure from grinding despite the 2.5mm thickness (which is thinner than a standard cutting disc) guaranteeing a fast, straight cut. The disc is also INOX (iron, sulphur and chlorine free) meaning that it can be used on stainless steel without any risk of material contamination or rust formation.

Hybrid 3 in 1 discs can greatly improve safety on site

HYBRIDS FLAP DISCS

The new Hybrid Flap Disc has been designed using a double row of mixed abrasive cloth on a flexible and durable fibre glass backing. Significant R&D and subsequent product testing proves that using a mixture of 60g material on the bottom layer and 40g material on the top layer leads to increased performance and life time of 20% over a standard flap disc.

FROM START TO FINISH

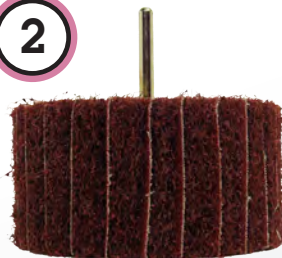

1

SPINDLE MOUNTED FLAP WHEELS

For general purpose cleaning and deburring applications.

2

INTERLEAVED SPINDLE MOUNTED FLAP WHEELS

For light deburring and pre-finish cleaning applications.

3

NON-WOVEN SPINDLE MOUNTED FLAP WHEELS

For final finish cleaning and polishing applications.

SPINDLE MOUNTED WHEELS INTERLEAVED

Made using premium quality non-woven materials and aluminium oxide paper leaves. Ideal for light deburring and pre-finish cleaning applications. Interleaved Spindle Mounted Wheels can be used on a wide variety of materials including stainless steel, standard/alloy steel, aluminium and non-ferrous metals.

NEWLY PACKAGED NON-WOVEN RANGE

The Abracs range of Non-Woven products are ideal for a multitude of industrial cleaning applications. Manufactured from premium grade material & suitable for use on virtually all materials including metals, plastics, stainless steel. A combination of material structure and a unique synthetic resin coating means that these products resist loading & prevent clogging. Our Non-Woven range is now available in brand new packaging options including card wraps, box labels and display boxes. Abracs Hand Pads Range is now card wrapped with all product information and USP's clearly displayed.

Turn to page 9 for full details of our new Packaging range.

Designed to give your customer all the information required to make an informed purchasing decision.

HAND PADS NON-WOVEN

Abracs Non-Woven Hand Pads provide consistent surface preparation. Ideal for cleaning a wide range of applications and specially designed to resist loading, prolonging pad life. Tightly woven for consistent action without compromising durability. Flexible construction is ideal for grooves, scratch in channels and other hard to reach areas. Available in 4 different levels of coarseness for different applications.

New & improved card wrap packaging displays all key features and USP's.

Non-woven hand pads are used in a wide variety of industries and are a great addition to your abrasives range.

QUICK-LOCK FOR SPEEDY DISC CHANGE

The Abracs range of "Quick-Lock" products can be used for cleaning, stripping, polishing and finishing all using the same simple system. Abracs twist on and twist off fitting means that different products can be fitted and removed quickly, safely and easily. This simple but innovative system means less downtime for operators and higher overall productivity. There is a Quick-Lock product for virtually all applications and materials. Quick-Lock Products are particularly useful in the automotive industry. Brand new packaging labels have been developed for every product in our Quick-Lock range.

Turn to page 9 for full details of our new Packaging range. Designed to give your customer all the information required to make an informed purchasing decision.

These specialist discs are popular for use within the auto-parts industry, for more information on how to target new markets with specialised abrasives contact the Abracs team.

QUICK-LOCK SANDING DISCS

Zirconium sanding discs suitable for use on a range of materials including stainless steel. Ideal for use in hard to reach places.

Quick-Lock discs should always be used with a Quick-Lock Backing Pad.

Diamond Tools Catalogue.

MANUFACTURING EXPERTISE

Abracs specialise in ultimate performance, expert quality Diamond Blade design and manufacture. We have a comprehensive range of innovative Diamond Blade solutions for all industrial & construction market needs. Developed with over 25 years market expertise. Abracs precision manufacture and modern quality control methods allow us to control and regulate the variables that affect blade life, quality of cut and product performance.

QUALITY LEVELS

Clear quality levels to aid product selection with 3 levels to cater for every professional market.

EXPERT ★★★★★

EXPERT-line products offer expert users the best quality product with maximum product benefits, reliability and an optimum price-performance ratio.

PRO ★★★★★☆

PRO-line products have been designed for high quality demands and frequent use in industry and trades. These products offer a great price-performance ratio and a high efficiency.

TRADE ★★★★★☆

TRADE-line products are reliable and professional quality with an attractive price-performance ratio for the price conscious consumer.

PRODUCT RANGE

GCM GENERAL CONSTRUCTION MATERIALS

These blades are designed to provide aggressive, fast and tough cutting of a large variety of advanced and composite general construction materials.

DCM DUAL CONSTRUCTION MATERIALS

This range has been designed specifically to accommodate the benefits of having one blade for two material types (General Construction and Abrasive Construction).

HCM HARD CONSTRUCTION MATERIALS

Our hard materials range is manufactured using a soft bond which is crucial to effectively cut hard materials such as granite.

3 EASY STEPS TO CHOOSING THE RIGHT PRODUCT

STEP 1

Choose a material you wish to cut

STEP 2

Select quality level of the blade

STEP 3

Select the blade size or the operational machine

ACM ABRASIVE CONSTRUCTION MATERIALS

The Abrasive Construction Materials range is designed specifically for asphalt, green concrete and other abrasive materials.

UCM UNIVERSAL CONSTRUCTION MATERIALS

The ideal blade for cutting a wide variety of different materials, no need to change this blade for new applications. The all in one.

DIAMOND BLADE TERMINOLOGY

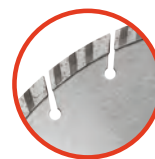

COOLING HOLES

Added visibility when cutting, and ensures heat dispersion and swarf removal for maximum yield out.

CONTINUOUS TURBO RIM

The castellation of the blade traps air in motion guaranteeing less chipping and faster cuts.

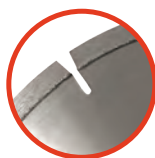

ANGLED TURBO SEGMENT

The angled turbo segment easily removes debris and helps cool the blade more efficiently.

KEYHOLE GULLETS

Ensures less chipping of the material being cut and reduces vibration levels.

NARROW GULLET

Narrow gullets ensure less chipping of the material, reduce vibration levels and minimise the chance of segment loss.

UNDERCUT TECHNOLOGY

Specific segment design "undercut technology" increases water flow and protects the segments from increased wear.

EXPERT★★★★★ GENERAL CONSTRUCTION MATERIALS

Expert-line General Construction Materials Diamond Blades are suitable for cutting virtually all construction materials including steel and reinforced concrete. The 10mm continuous segment eliminates chance of segment loss and cooling hole technology reduces cutting temperature and increases user visibility for enhanced safety. Manufactured using premium quality diamonds and a strengthened, pre-stressed metal body. This product offers one of the best costs per cut ratios in the industry.

EXPERT ★★★★★ DUAL CONSTRUCTION MATERIALS

Expert-line superior quality Dual Construction Materials Blade for both general purpose and asphalt/abrasive materials. 10mm laser welded diamond segment with undercut protection provides increased cutting life and exceptional performance. Undercut protection technology protects the segment from abrasion, reducing the risk of segment loss and increasing product life. Manufactured with extra narrow gullets to reduce clogging. The ideal blade for the professional contractor.

PRO ★★★★★ HARD CONSTRUCTION MATERIALS

Expert-line Hard Construction Materials Blades have been expertly developed with a soft bond so they can effectively cut through very hard materials such as granite with relative ease. The 10mm angled turbo segments and narrow gullets reduce the chance of segment loss & maximise performance. Manufactured with premium quality diamonds and a strengthened, pre-stressed metal body.

EXPERT ★★★★★ ABRASIVE CONSTRUCTION MATERIALS

Designed with a thicker core that resists flexing and provides a straighter cut, this versatile blade can slice through asphalt and green concrete and can also be used on medium to soft materials such as sandstone and breeze blocks. Undercut protection technology protects the segment from abrasion, reducing the risk of segment loss and increasing product life. Laser welded segments ensure maximum strength, performance and reliability. Extra wide gullets aid stock removal and add further protection to the segments during the cutting process.

BRAND NEW PRODUCT RANGE

Abracs brand new range of Reciprocating Saw Blades is now available. We now stock a full range of Expert-line Reciprocating Saw Blades for a wide variety of applications. Blade types range from coarse cutting wood blades, precision cutting ultra flexible Metal blades, combination Wood and Metal cutting blades for use on materials like nail embedded wood and Demolition Blades for heavy duty cutting on a wide variety of construction materials. Our new blade range is packed with product features such as ultra flexible for flush cutting, heavy duty for strength & durability and progressive cutting for a smooth start to cutting hard materials. We have selected high carbon steel, bi-metal and HSS material blade construction within our product ranges to ensure maximum performance when used on the intended application.

RECIP SAW BLADES METAL

Abracs Reciprocating saw blades for Metal are available in a range of tooth configurations and sizes. Blades are available for fast, precision or fine cutting in a selection of ultra flexible or heavy duty blade types. Manufactured using Bi-Metal, Abracs expert-line reciprocating saw blades for metal are ultimate performance, long life and premium quality. Suitable for use on a wide range of applications including sheet metal, pipes, profiles, tubing and box section. Every Abracs Reciprocating Saw Blade has a universal fitting for use on all popular machine types.

Brand new product range used by a wide range of industries.

All Abracs Reciprocating Saw blades have a universal fitting and are suitable for use on all popular machines.

JIGSAW BLADE TYPES

HIGH CARBON STEEL

Jigsaw Blades manufactured using High Carbon Steel are for use on softer materials such as softwood, wood fibreboards and soft plastics.

BI METAL

Jigsaw blades that are manufactured using Bi-Metal are suitable for use in hardwood, abrasive wooden materials, hard plastics, and harder materials such as non-ferrous metal and ferrous metal.

HIGH SPEED STEEL

Jigsaw Blades manufactured using fully hardened high-grade High Speed Steel are for use with harder materials such as metal, aluminium and non-ferrous metal.

JIGSAW BLADES

Abracs Jigsaw Blades come in an extensive range of sizes, tooth shapes and configurations and are manufactured using a variety of materials to make each individual blade the highest possible performance for cutting the intended material application. We have specific blades for use on wood, metal, wood & metal and aluminium cutting applications. Abracs Jigsaw Blades are packed in cards of 5 blades which displays the tooth shape, a product cut-out, a ruler guide for size reference, clear product type descriptions and use industry standard codes to make blade selection easy. All blades in the range are long life, professional performance and competitively priced.

For more technical information on our extensive range of Jigsaw Blades or for help with product selection contact the Abracs Team.

All Abracs Jigsaw blades have a universal fitting and are suitable for use on all popular machines.

HOOK & LOOP GOLD SANDING DISCS

Industrial quality 150mm Hook & Loop Sanding Discs available with dust extraction holes or without. The aluminium oxide grain has a specialised stearate coating and a semi-open grit binding which prevents clogging and significantly increases the sanding speed. Suitable for general purpose sanding but specifically designed for applications involving paints, lacquers, putty and primers i.e within the automotive industry. The heavy duty paper backing makes the product extremely durable and long lasting and the Hook & Loop backing ensures quick and easy changes on most brands of sanders.

Use desired grit listed in spec in highlighted area of the product code

GOLD P.S.A SANDING DISCS

P.S.A. (Pressure Sensitive Adhesive) sanding discs are premium quality aluminium oxide grain with a specialised stearate coating and a semi-open grit binding which prevents clogging and significantly increases the sanding speed. Designed for applications involving paints, lacquers, putty and primers i.e within the automotive industry. The heavy duty paper backing makes the product extremely durable and long lasting and the P.S.A. backing ensures quick and easy changes on most brands of sanders.

P.S.A Discs Should always be used with a backing pad
See information below.

DRY WALL SANDING PRODUCTS

The Abracs range of dry wall sanding products are ideal for a multitude of different applications including dry wall, joint compounds, sheet rock, fillers, plasters, paint boards and soft wood. Made from premium quality materials for outstanding performance, long life and great value.

SPIRABANDS

Spirabands are easy to fit, give good access to curves and bends and are an excellent blending and de-burring tool. They are manufactured using premium quality abrasive grit on durable cloth backing and can be used on a full range of materials including metals, stainless steel, plastics and wood. Available in both aluminium oxide and zirconium.

Spirabands should always be used with the correct sized drive arbor.

WIRE BRUSH PACKAGING OPTIONS

BLISTER PACKS

Each wire brush is individually packaged in a protective blister pack with clear and easy to read product information.

BULK PACKAGING

Bulk packaging options are available, with a reduced price for plain white boxes this is ideal for customers that don't need to display the product in a retail environment.

DISPLAY PACKS

Colourful, eye-catching and perfect for trade counter and shop displays.

Brushes are packed in bulk inside the display box.

WIRE BRUSHES TWIST KNOT CUP

Cup Brushes suitable for angle grinders and other specialist machinery. Twist Knot Brushes are sturdy and aggressive whilst offering the operator maximum safety. They are ideal for the removal of slag, rust, paint and residues of any kind. Available for use on mild steel and stainless steel.

Call the Abracs team for information on how you can target new customers and industries with our Wire Brush Range.

Use **WB** in the highlighted area of the product code in place of **ABWB** for bulk packaging where applicable e.g. **WB07014T**
